EDUCATION

Vellore Institute of Technology
BTech in CSE with Specialisation in IOT

2020- present
Vellore, TN

SKILLS

- Proficient in C and Java programming languages, developed through coursework and personal projects.
- Utilized Python to create a simple project and applied C in solving algorithmic challenges, showcasing practical application of skills.

INTERESTS

- Enthusiastic about software development, particularly intrigued by the intersection of technology and problem-solving.
- Active member of online coding communities, participating in discussions and sharing insights on coding techniques.
- Keen interest in exploring the potential of emerging technologies, including AI and machine learning, through self-directed learning.

PROJECTS

- Python-Based News Fetcher (<https://github.com/anandify/PyProjekt>):
 - Developed a Python script that fetches and displays the latest news headlines from various sources using web scraping techniques.
 - Utilized libraries like BeautifulSoup to extract relevant information and present it in a user-friendly format.
 - Demonstrated proficiency in Python programming, data extraction, and automation.
- Pregnancy Companion Web App (<https://github.com/anandify/MedcareCB>):
 - Led the design and implementation of a web application aimed at providing support and information to pregnant women during their trimesters.
 - Utilized HTML, CSS, and JavaScript to create an intuitive user interface for easy navigation.
 - Integrated features such as personalized week-by-week guidance, nutritional information, and appointment tracking.
 - Showcased empathy and user-centered design by tailoring the app to meet the specific needs of the target audience.
